Guilherme Leite

05/10/2017

1 - Proposal

1 bolinha tracking - 2 bolinhas tracking - varias bolinhas tracking - 2 bolinhas mesma cor sem confundir

To the final project we propose a escalation of a ball tracking implementation, at first a single coloured

2 - Dataset

propria dataset numa superficie clara, sempre o mesmo background, iluminacao controlada como baseline - mais pra frente mudar essas variaveis

3 - Related Work

Important note: The borders seen in the figures are not part of the image, they are figurative information about the starting and ending points of the image. Moreover, all the image scales in this report were changed in order to make the text more readable.
